

Dodge Durango 2007-2008

DG-92-08-G3

PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS VSM G3

All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

TOOLS REQUIRED: Dash Trim Removal Tool (DTRT), Phillips screwdriver, 7mm socket and driver

PARTS INCLUDED: VSM G3, Lock Plate, J Stem

LOCATION: Right of Radio

Step 1: Reach into the cubby located underneath the power supply **Photo #1**. Underneath are two (2) 7mm bolt securing the radio bezel to the dash molding. Remove the two 7mm bolts and place them carefully aside.

Step 2: Insert the DTRT in between the radio bezel and the dash molding, **Photo #2**. Use the DTRT in a gentle twisting motion around the radio bezel releasing six (6) retainer clips. Once the retainer clips have been released, do not disconnect any wiring to the bezel, simply allow the bezel to hang gently out of the way.

Step 3: Remove the upper rt hand corner Phillips screw securing the right side of the radio and place it carefully aside. Place the VSM G3 flush to the radio molding, and over the screw hole (picture 3). Replace the screw and tighten, be sure the highlighted edge is snug to the dash.

Step 4: With the VSM G3 secured and flush to the radio molding, place the dash back together in the reverse order in which it was dismantled. You have successfully installed your VSM G3!

Note: Note: See the Assembly Instructions for G3 Components for additional information.
