

Extension Bracket

with BRAVO Balls and Lock Plates

PART NUMBER: EX-202

Installation Instructions

Please read all instructions thoroughly before installing this product

Contents: Extension bracket with two BRAVO style balls attached. Includes two lock plates and hardware.

Step One:

THE EX-202 Extension bracket is an excellent add on accessory when mounting two devices. The main plate has numerous holes to get just the right mounting position. The Lock plates are adjustable and lockable. Adjust, rotate or even remove for your application. The BRAVO balls are the same 17mm that Garmin uses making this a perfect option for the Garmin Nuvi GPS units.

Each device can be independently adjusted. We are aware of your base mount and its holding capacity when deciding whether to use or not.

Not recommended for more than 1.2 lbs per ball

Shown from behind: iPhone and
Garmin Nuvi 660.

Shown with the Garmin Nuvi 660
and Lock Plate.
