**PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS Pro.Fit VSM™.**  
All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

**Pro.Fit logo and part number will be right side up and readable when installed.**

*TOOLS REQUIRED:* Hook tool, #1 Phillips screwdriver.

*PARTS INCLUDED:* **Pro.Fit VSM™** mount, instructions.

*LOCATION:* To the right of the climate control.

#### STEP 1.

Begin by removing trim bezel surrounding radio and temperature control unit. To do this, insert hook tool between dash pad and radio trim bezel at the bottom right corner of bezel next to the cigarette lighter. A total of eight (8) clips need to be released [three (3) on bottom, three (3) on top, one (1) on left and one (1) on right.] Hook from behind and pull straight back towards yourself. Continue using hook tool along bottom, releasing each clip, continuing until all clips are released. Set bezel aside.

#### STEP 2.

Locate and remove four (4) factory screws [two (2) on right and two (2) on left of climate control unit.] Pull temperature control unit out, until **Pro.Fit VSM™** will fit behind right side of temperature control unit mounting bracket.

#### STEP 3.

Align **Pro.Fit VSM™** with centering pin and factory screw holes. Slide temperature control unit back into place. Insert and tighten factory screws.

#### STEP 4.

Reinstall trim bezel back into place. Attach hang-up cup onto **Pro.Fit VSM™**.

This completes the installation of your **Pro.Fit VSM™**.
