

# Secure Strap

## Installation Instructions

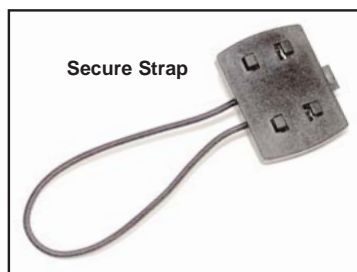

### SS-1686

Please read complete instructions before installing and using the Secure Strap.

This accessory is not a stand-alone mount or holder.

**PARTS INCLUDED:** Secure Strap

**TOOLS REQUIRED:** None

Designed to work with the following holders:

The Secure Strap is an accessory used to give added security when an electronic device is held in either a miGRIP (MI-400) or miniGRIP (MI-200) holder. **Common applications: Motorcycle, bicycle or marine.** The secure strap is sandwiched between the holder and an adapter plate (included with miGRIP or miniGRIP) The four tab interlocking parts make for a rigid and secure fit in a variety of applications. Each of the parts snap together.

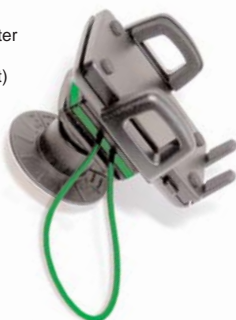

The secure strap locks onto the back of the miGRIP or

The secure strap locks onto the back of the miniGRIP and

the secure strap locks onto the front of the (1642) adapter plate.

Once the device is in the holder, stretch the secure strap over and hook on opposite side. To remove your device, unhook secure strap, depress the release button and the side wings will spread. This product can be used without tools. Keep in mind the parts fit together very snugly.

Installed between an adapter plate and miGRIP (shown on LOBOY mount)

Highlighted strap is for illustration only. Actual secure strap is black.
