WWW.PRO-FIT-INTL.COM**

PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS Pro.Fit VSM™.
All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

Pro.Fit logo and part number will be right side up and readable when installed.

TOOLS REQUIRED: # 2 Phillips screwdriver, hook tool.

PARTS INCLUDED: Pro.Fit VSM™, instructions.

LOCATION: To the right of the climate control.

STEP 1.

Begin the installation by removing the bezel that surrounds the shifter. To do this use the hook tool to get behind the bezel in the right rear corner and pull up to release first clip. Do the same on the left rear corner. Once both rear clips are loose grasp the bezel with your hands and work loose the two (2) front clips. Pull bezel up and over shifter and set aside. **Note:** On manual transmissions let bezel hang out your way.

STEP 2.

Remove trim bezel that surrounds the radio and climate control by inserting hook tool behind the bezel in the upper right hand corner and pull toward you to release clip. Do the same on the upper left corner. Once the two (2) top clips are released grasp the bottom of the bezel with both hands on the left and right sides, pull back toward you to release two (2) bottom clips. Do not disconnect wiring. Let the bezel hang to the right side of middle console.

STEP 3.

Using a # 2 Phillips screwdriver locate and remove two (2) Phillips screws to the right of the climate control. Set screws aside. Align the holes in the Pro.Fit VSM™ with the holes to the right of the climate control and re-insert Phillips factory screws and tighten. **Caution: Do not over tighten.**

STEP 4.

Reassemble dash in reverse order securing all clips.

This completes the installation of your Pro.Fit VSM™.
