

WindowMate

PART NUMBER: WM-36

The WindowMate is a premium suction mount for windshield or glass applications and features an integrated swivel which allows an additional 30-degree adjustment in any direction. It installs in seconds without tools and is easy to use.

PARTS INCLUDED: WindowMate suction mount, hardware pack

Please read complete instructions before installing the WindowMate.

For best results the WindowMate and glass it is mounted to should be at room temperature during installation.

STEP 1.

The WindowMate is designed to be attached to a windshield or other non porous material. Attach your holder or cradle (not included). Select the best location for practical and safe use. Try to avoid blocking your field of vision or any controls. Clean the mounting surface with window cleaner to assure maximum suction. Bend the flexible arm into desired shape before attaching to window. Photo 1.

STEP 2.

With the locking lever in the up position, press the suction cup firmly against the glass. Push lever down to attach suction cup to the window. Photo 2. (Lever is colored orange for illustration purposes only). It is best to install when both the windshield and WindowMate are the same temperature. It is not advised to take a WindowMate that is room temperature and install it on a very cold windshield. The severe temperature changes may cause the suction and seal to release.

STEP 3.

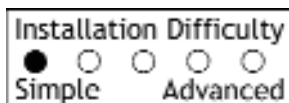

Once installed, be sure to fine tune its position for your convenience. Loosen, adjust and resnug the lock down collar for best results.

NOTE: Suction mounts are not permanent mounts. They will need to be removed and re-attached from time to time.
